Marina Angelaki, EKT Athens,15.06.2017

OpenAIRE

An Open Knowledge & Research Information Infrastructure

Open Access infrastructure for research in Europe

THE POINT OF REFERENCE FOR OPEN SCIENCE IN EUROPE

Human Network

e-infrastructure

- ✓ NOADS: National Open Access Desks
- ✓ Monitor and foster the adoption of Open Access policies at the local level
- ✓ Support the implementation of the Open Data in H2020
- ✓ FP7 post grant APCs Pilot

- e-infrastructure for monitoring impact of OA mandates and research projects
- ✓ OpenAIRE guidelines for metadata exchange
- ✓ Zenodo Repository for the deposition of research products

50 Partners: EU countries, data centers, universities, libraries, repositories

RESEARCH ADMINS

How to monitor research results. What services to use for your needs.

LEARN ON POLICIES AND HOW TO COMPLY

HORIZON 2020

Open Access is the

DEFAULT

for research results in H2020

Multi-beneficiary General Model Grant Agreement

29.2 Open access to scientific publications

29.3 Open access to research data

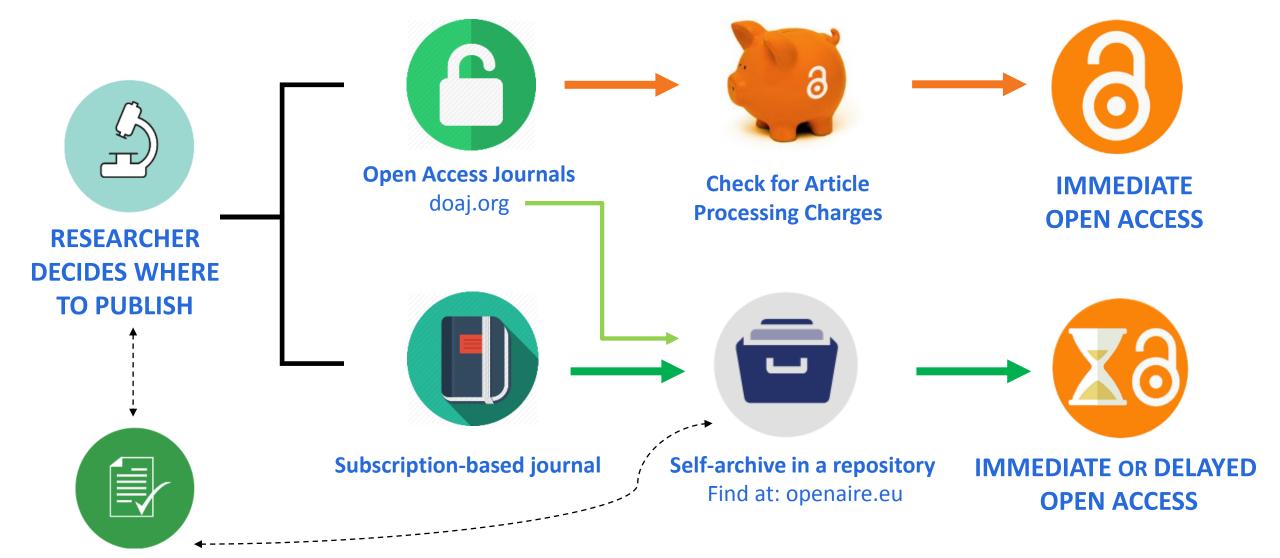

Open Access requirements and who is covered by them?

All beneficiaries of H2020 funding must provide open access (free of charge, online access for any user) to all peer-reviewed publications by depositing them into a repository

http://ec.europa.eu/research/participants/data/ref/h2020/grants_manual/amga/h2020-amga_en.pdf

Check publishers policies on

www.sherpa.ac.uk/romeo

In other words...

Authors are free to choose between the two main and nonexclusive routes toward Open Access

- Self-archiving (,green' open access): the published article or the final peer reviewed manuscript is uploaded in an online repository access is often delayed (,embargo period')
- Open access publishing (,gold' open access): the article is immediately in open access mode, through the publisher. The associated costs are covered by the author/institution/funder.

The article must always be deposited in a repository, even if the gold route has been choosen.

Where to deposit?

Institutional repository

OR

 Disciplinary repository (arXiv, Europe PubMed Central, etc.)

OR

 Zenodo (<u>www.zenodo.org</u>) if none of the above is available. EC-cofunded, multidisciplinary repository, for publications and data.

Remarks:

- Finding a repository via registries: ROAR
 http://roar.eprints.org/, OpenDOAR
 http://www.opendoar.org/ or via OpenAIRE
 (more details later)
- A list of publications on the project website is not sufficient.
- How to bring all publications together?
 - OpenAIRE-compatibility to enable the harvesting of metadata (more details later)

where what when

Are Article Processing Charges (APCs) supported?

Yes

 For open access publishing, researchers can publish in open access journals, or in journals that sell subscriptions and also offer the possibility of making individual articles openly accessible (hybrid journals).

 Where the case, the Article Processing Charges (APCs) incurred by beneficiaries are eligible for reimbursement during the duration of the action.

FP7 Post-Grant Open Access Pilot

- Pilot runs for two years (i.e. until Apr 30th, 2017)
 Now extended for 8 more months!
- Provides funding to cover the OA publishing fees for publications arising from completed FP7 projects
- 4 million euros are made available by the EC to fund the OA "post-grant" publications of over 8,000 completed FP7 projects
- No hybrid journals; 2000 EUR cap on APCs; max 3 pubs per project

OPEN DATA IN H2020

Multi-beneficiary General Model Grant Agreement

29.2 Open access to scientific publications

29.3 Open access to research data

Which H2020 projects are affected?

Projects starting from January 2017 are by default part of the Open Data policy. If your project started earlier and stems from one of these Horizon 2020 areas, you will automatically be part of the pilot as well:

- Future and Emerging Technologies
- Research infrastructures (including e-Infrastructures)
- Leadership in enabling and industrial technologies Information and Communication Technologies
- Nanotechnologies, Advanced Materials, Advanced Manufacturing and Processing, and Biotechnology: 'nanosafety' and 'modelling' topics
- Societal Challenge: Food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy selected topics in the calls H2020-SFS-2016/2017, H2020-BG-2016/2017, H2020-RUR-2016/2017 and H2020-BB-2016/2017, as specified in the work programme
- Societal Challenge: Climate Action, Environment, Resource Efficiency and Raw materials except raw materials
- Societal Challenge: Europe in a changing world inclusive, innovative and reflective Societies
- Science with and for Society
- Cross-cutting activities focus areas part Smart and Sustainable Cities.

Open Research Data policy requirements

- Deposit the data underlying your scientific publications, including the metadata, documentation and tools needed to validate the results, in a research data repository.
- Sharing more data is encouraged.
- Write, and keep up-to-date, a Data Management Plan.
- Make data "as open as possible, as closed as necessary":
 opting out fully or in part is possible, but needs
 justification.

Reasons for opting out

- Participation is incompatible with the Horizon 2020 obligation to protect results that can reasonably be expected to be commercially or industrially exploited;
- Participation is incompatible with the need for confidentiality in connection with security issues;
- Participation is incompatible with rules on protecting personal data;
- The project will not generate / collect any research data; or
- There are other legitimate reasons not to take part in the Pilot.

Note that **partial opt out is possible** – and preferable to full opt out!

OpenAIRE helpdesk – direct point of contact for all H2020 and Open Science questions

- SHARE RESEARCH. SHAPE A **FUTURE.** Open Access to research results benefits everyone.
- ✓ Regular webinars on meeting H2020 Open Science requirements and other key Open Science topics
- ✓ Workshops (~40 workshops in OpenAIRE2020) on Open Access, Open Data, Open Peer Review, measuring OA impact, etc.
- ✓ Factsheets, briefing papers & FAQs for researchers, research
 administrators, project coordinators & data providers
- ✓ Updates on Open Science via monthly newsletter and blog:
 - https://www.openaire.eu/newsletter/view
 - https://blogs.openaire.eu/

Advising on Open Science

 Aligning/harmonizing Open Data policies across Europe via our National Open Access Desks

- Providing feedback to EC on Open Science policies
 - Open Access (OA market study)
 - Open Peer Review
 - Open Metrics
 - Open Data
 - Until 21 June 2017, OpenAIRE is collecting feedback on the Horizon 2020 template for Data Management Plans:

https://www.surveymonkey.com/r/OpenAIRE DMP survey
