NATIONAL DOCUMENTATION CENTRE

## National Documentation Centre in Greece (EKT)

“We collect, aggregate, organise, document, disseminate and preserve the national scientific and cultural output, content and data that is being created in Greece”

national aggregator for cultural content

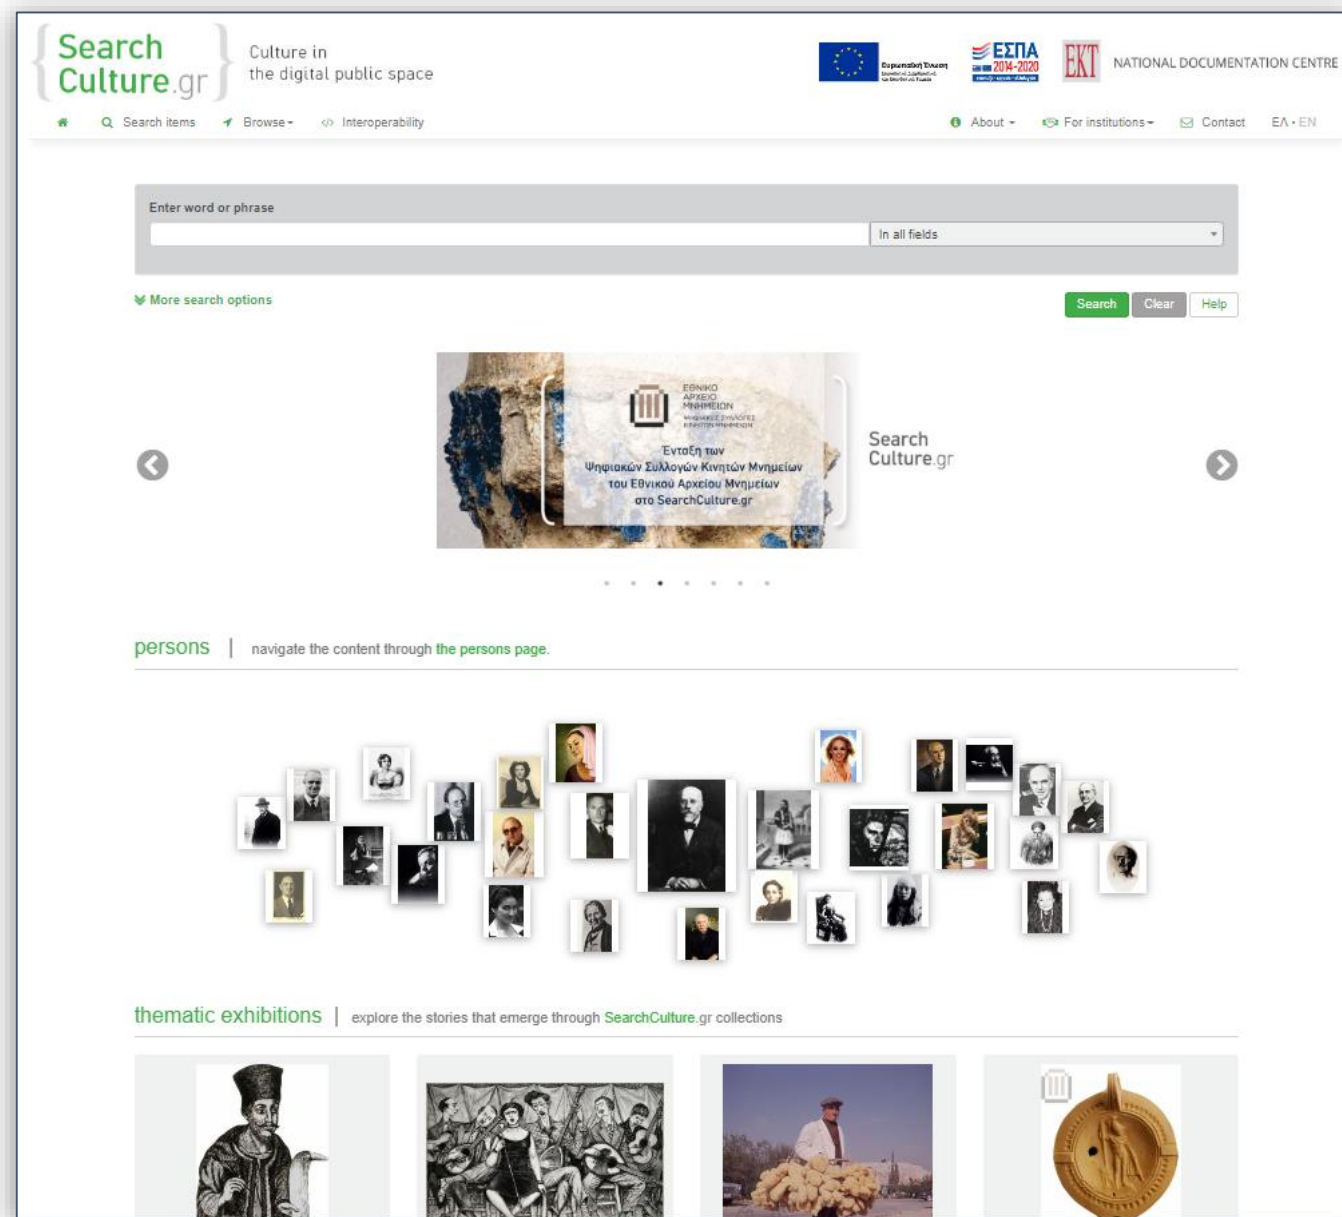

national aggregator for scientific content

## The national aggregator for Greek content

- **76 institutions- 100 collections**  
*museums, archives, ephorates, municipalities, foundations, research centers and libraries*
- **800.000+ items**  
*archeological sites, manuscripts, folklore and oral tradition, fine art and crafts, religious artifacts, maps, books, etc*
- **500.000+** items delivered to **Europeana**

possible by the semantic enrichments carried out by EKT

- search across all content
- combined search and filtering results with multiple criteria:
  - type, subject, date, historical period, license, collection and language
- browsing through types, subjects and historical periods
- thematic exhibitions

# Semantic Enrichment Methodology

- Source metadata is kept intact
- **Collection-specific enrichment methodology** by configuring the mapping rules from the original distinct metadata values to vocabulary terms
- **Semantic enrichment** per distinct metadata value of **item types, subjects, temporal values** and **historic periods**
- Development of or own **bilingual vocabularies** or extensions or adaptations of existing popular vocabularies (ie UNESCO thesaurus)
- Linking to popular vocabularies and resources (ie AAT, Wikipedia, etc)
- **Semi-automatic process**, heavily curated but supported by self-learning smart tools

# Semantic Enrichment Tools

**Semantics.gr**: platform developed by EKT where any institution can create, curate and publish LOD vocabularies, taxonomies, thesauri and authority files in any schema (SKOS but also MADS/RDF, EDM Contextual Classes, etc)

**Enrichment tool of Semantics.gr**: a tool for setting enrichment mapping rules from distinct metadata values to vocabulary terms.

It allows for semi-automatic and self-improving enrichment processes.

## Adapting the enrichment scheme for Persons

- Past enrichments : classification using hierarchical vocabularies → generalization
- Enrichment of persons: disambiguation → extensive research
